

Hello!

1 - For use in FCPX please copy the folder “Glitch Transitions” and go to **Applications/Final cut/Show package contents/contents/
/plugins/media providers/motion effect/contents/resources/
templates/transitions**, and paste it in this folder.

2 - For use in Motion copy folder “Glitch Transitions” and go to **system/users/*your username*/movies/motion templates/
transitions**, and paste it in this folder.

3 - Now open the Final cut, and in the effects browser open the **transitions** window and there you will find the folder with the transitions.

4 - To personally adjust this effects, right click on the desirable transition in FCPX and open in Motion.

5 - When you finish you adjustments in Motion just click **file/
save** and transition will be automatically saved in FCPX.
