

## Help File

Hello, dear colleagues!

Thanks for buying this template.

This file answers your questions:

### 1. How to use Photo/Video in this template?

After opening the template you have to import your media to "Project" panel and put them inside folder called "Media".

Then open folder called "Placeholders" and you'll find 22 compositions, open each one of them and drag a photo inside each one of them and zoom adjust the picture to the desired size (key "S").

### 2. How to edit the texts?

In "Project" panel there is a folder called «Text», open it and you'll find 7 compositions, inside each one of them there is a text layer, double click on the text layer and write your own text or does it remove.

Thats all

If you have any questions - please, contact me via my personal page Hope you like it and again - thanks for buying.
