Customization

Before open these project please download free font:

<https://www.fontsquirrel.com/fonts/montserrat>

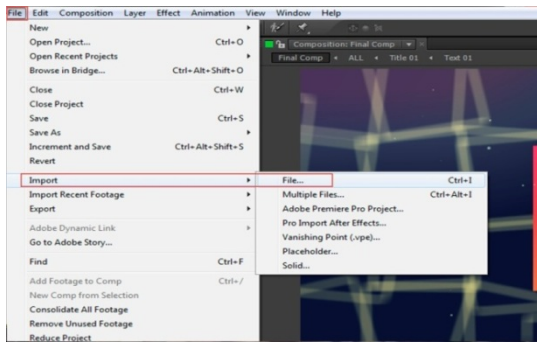

1. Project Overview

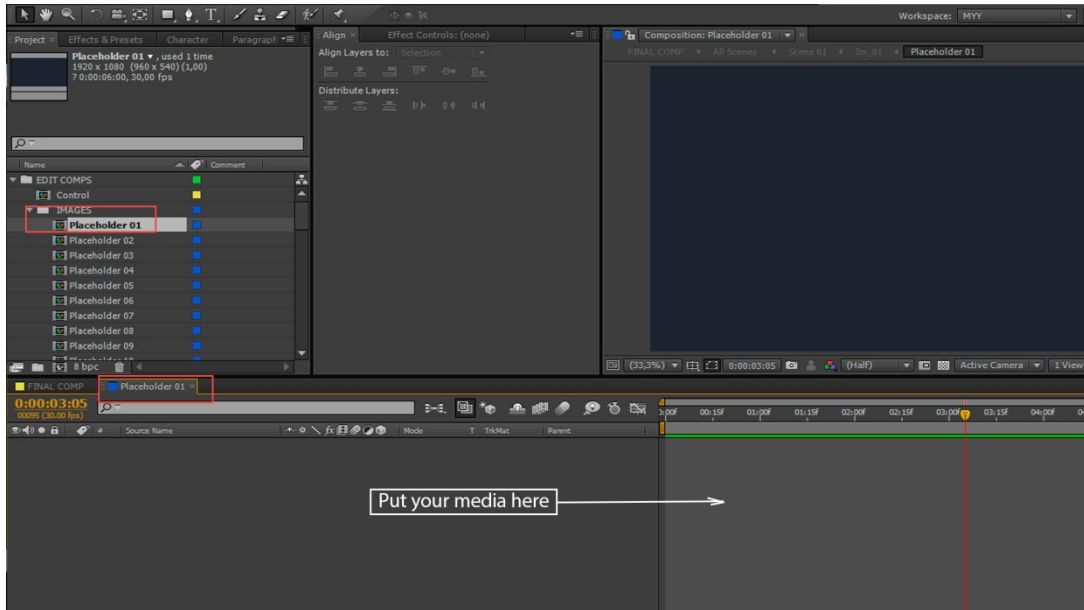

Folder **IMAGES** includes all media placeholders;
Folder **TEXT** and **Text Elements** includes all text placeholders;
Composition **FINAL COMP** – composition for render;
Put your music in composition **Put your music here**;
Put your logo in composition **LOGO**;
Ignore folder **Others**.

2. Edit Media

The First thing you need to do is to import all media that you would like to use into the template.
Click **File, Import, File**.

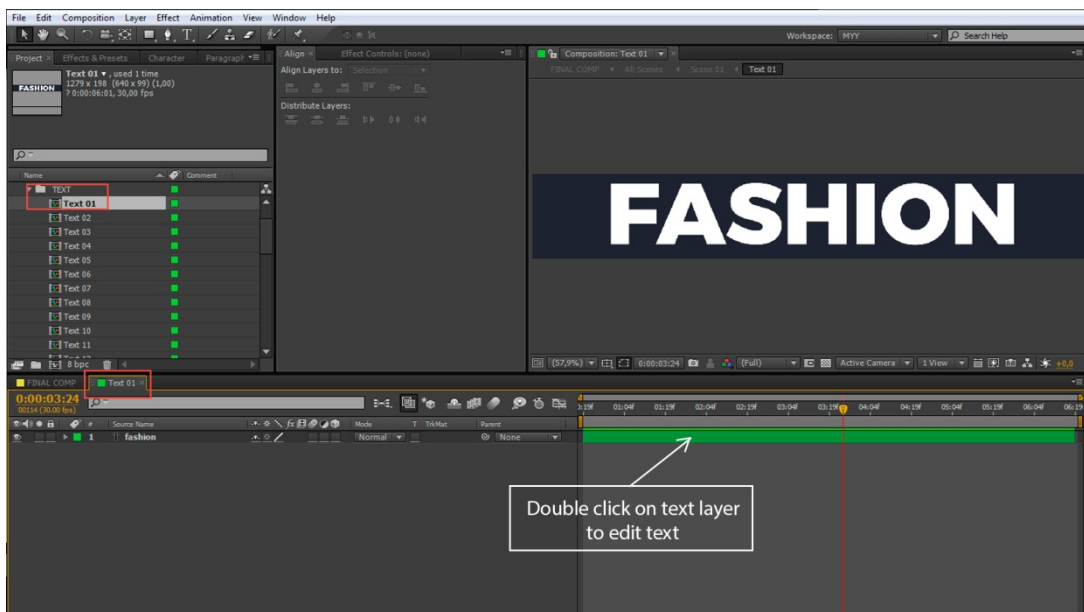

The next step is to insert your media in each placeholder from the **IMAGES** folder.

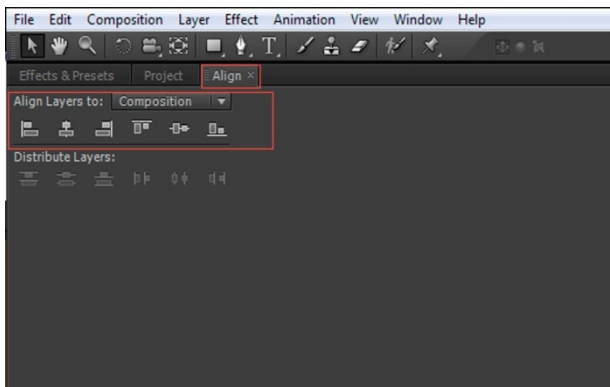

Simply drag image or video you want from the Project Panel into the Timeline. Don't forget to resize your media according to the composition size.

3. Edit Text

Open up each Text N composition double click on it.

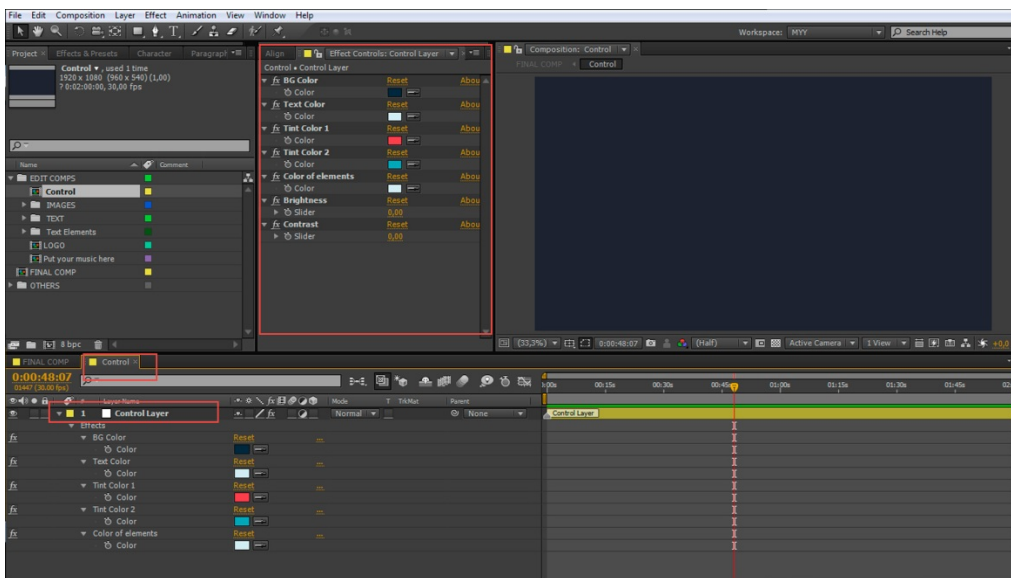

Double click on text layer to change text. Do not delete an existing layer, it contains an animation.
Align text if it necessary.

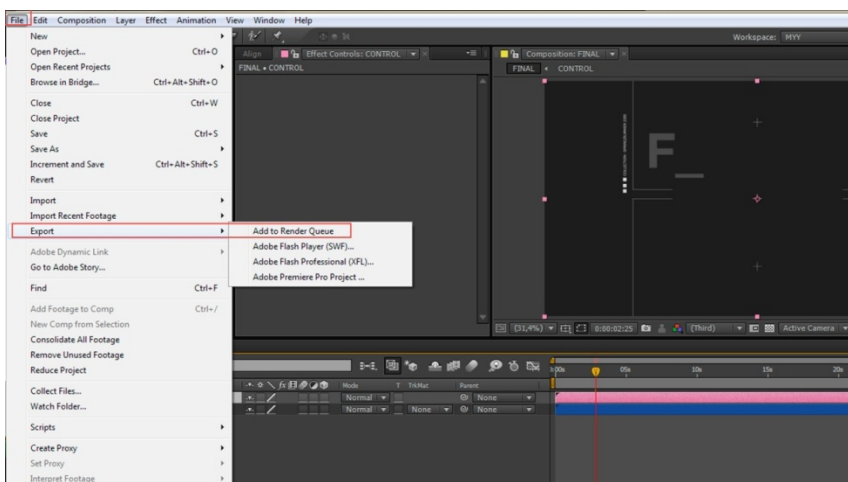

4. Contol Composition

Open **CONTROL** composition double click on it, press on Control Layer, make all necessary changes in the Effect Control Panel. You can change colors of the project, change brightness and align contrast.

Now We are ready to render this template. Choose Final composition and render it.

Well, that's it. I hope you enjoy this template.

If you like this project do not forget to rate it!

Thanks!
