

Hello!

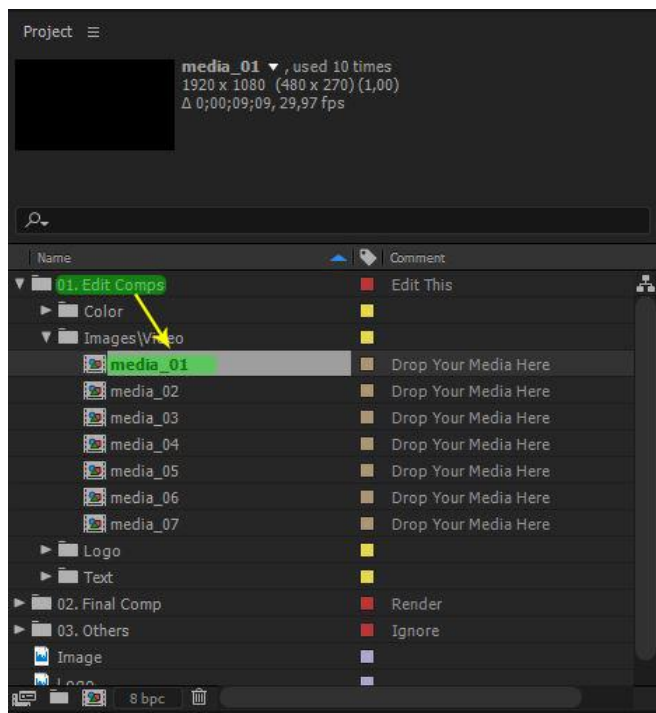

1. Open project file with After Effects CS5.5 or above.

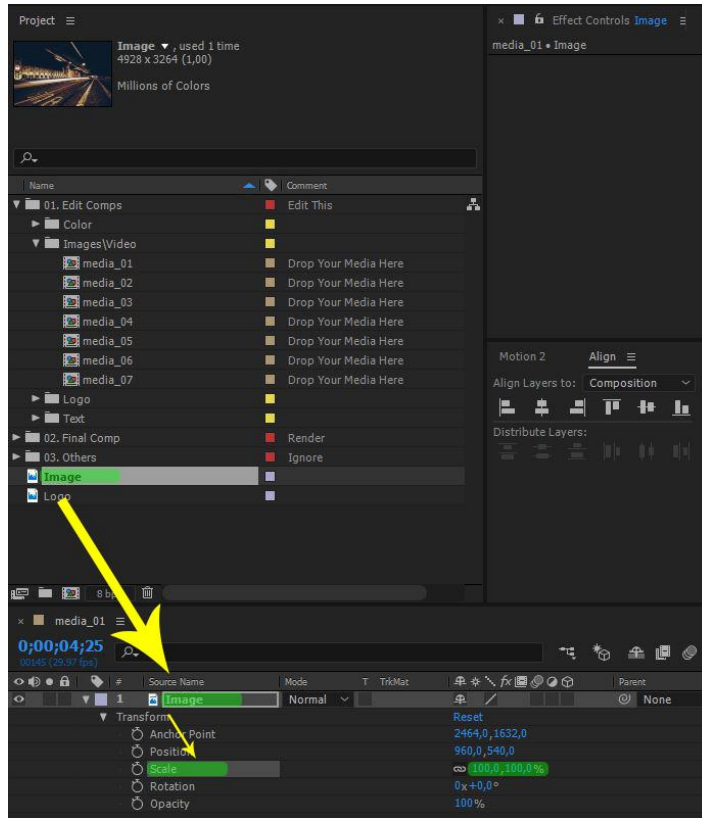

2. First import your media files. Right click on empty space, select Import Files and choose files to import.

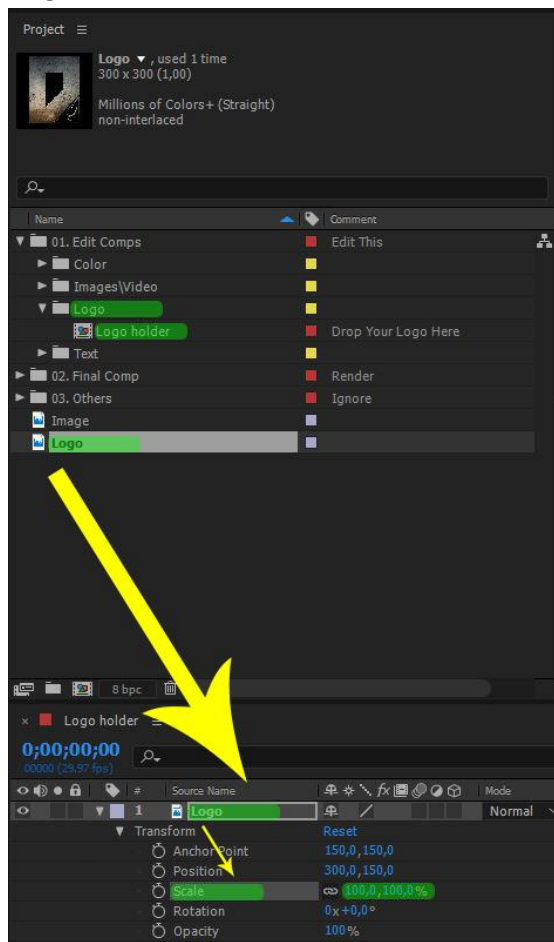

3. Open "Edit Comps" folder, than "Image\Video" and double click any media composition to open it.

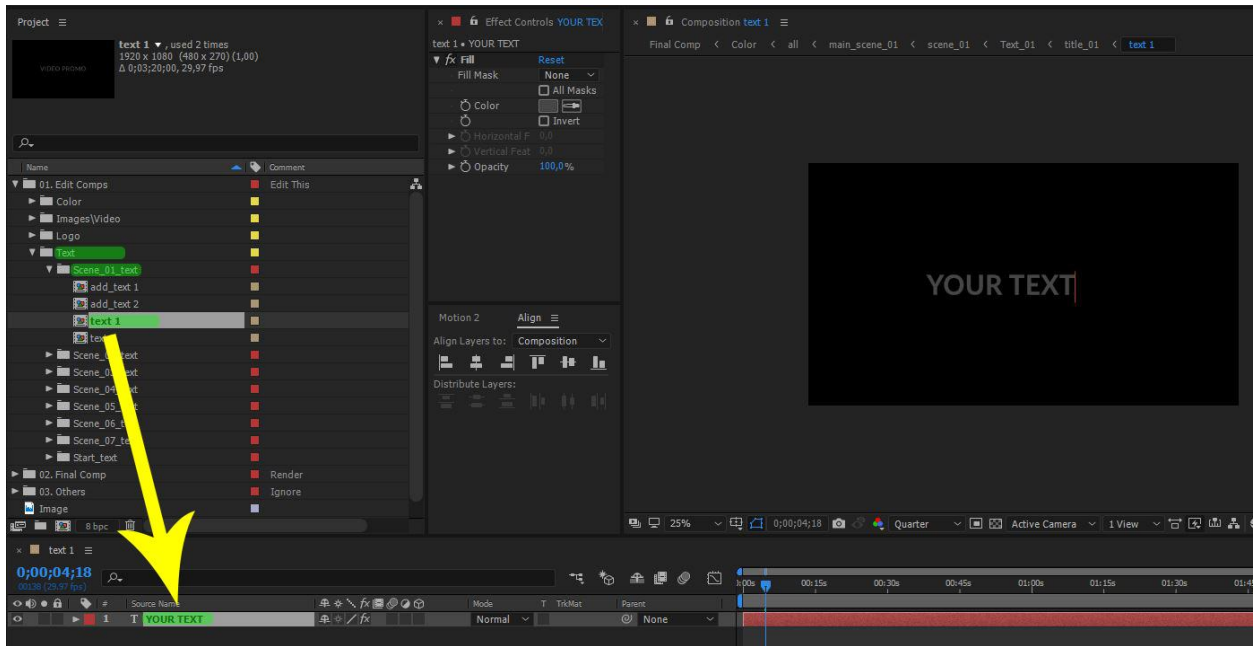

4. Select your media file and drag it in to the timeline, use scale to fit media comps size.

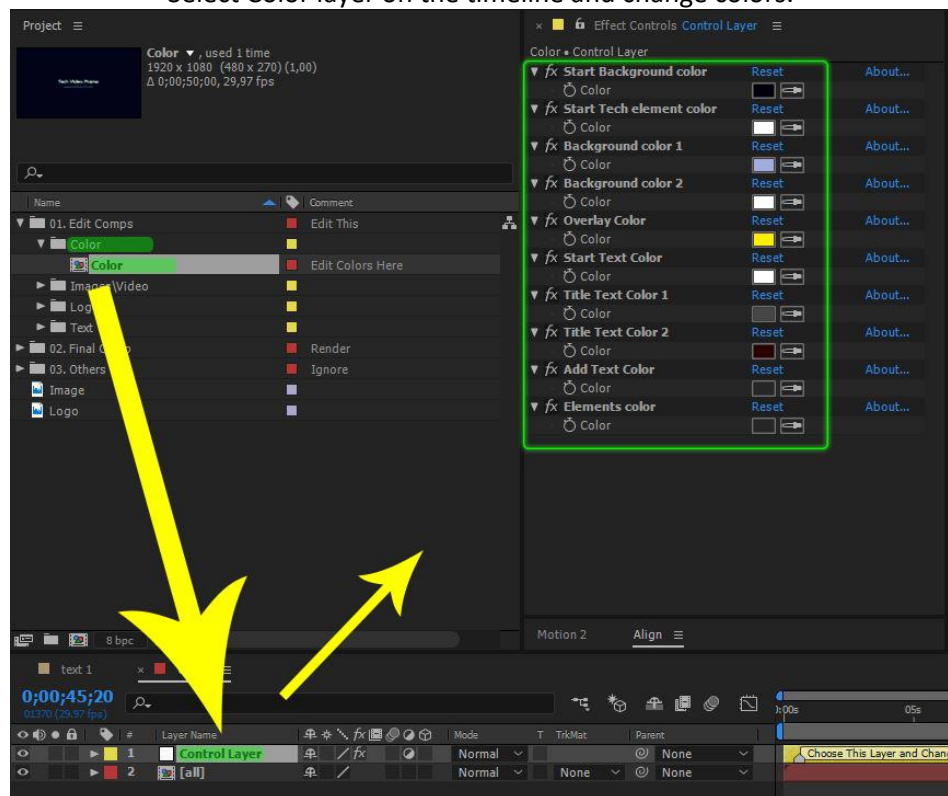

5. Open “Edit Comps” folder, than “Logo” folder and double click logo composition to open it. Select your logo file and drag it in to the timeline, use scale for best view.

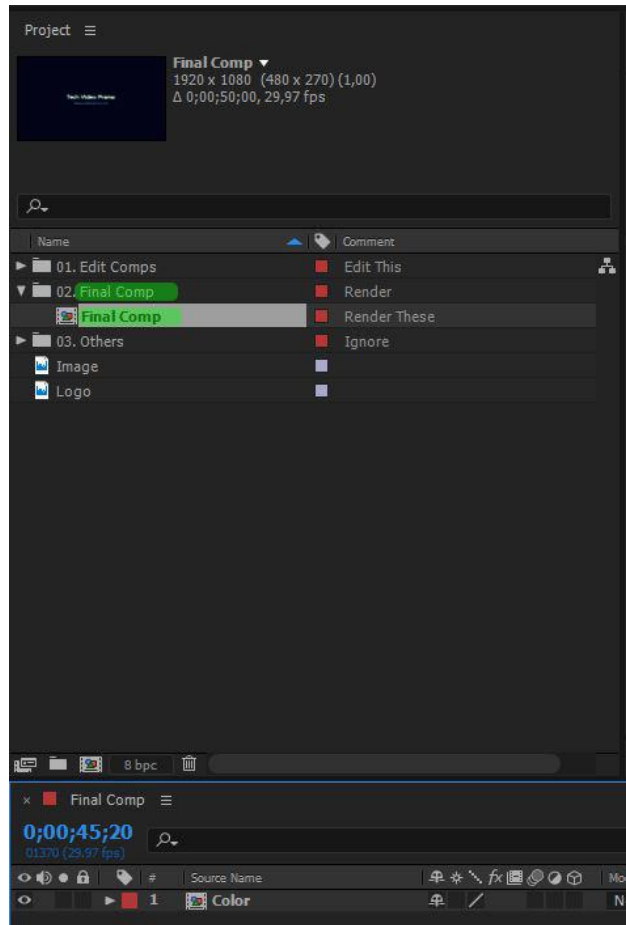

- Open "Edit Comps" folder, than "Text" folder and double click any text composition to open it. Double click text layer on the timeline and enter your text.

- Open "Edit Comps" folder, than "Color" folder and double click Color composition to open it. Select Color layer on the timeline and change colors.

8. Choose “Final Comp” Folder, double click “Final Comp” composition and render it for final result.

Thank you!
